Affected Products

This Hotfix applies to the SP1 versions of Autodesk AutoCAD 2014 and Autodesk AutoCAD 2014-based vertical products.

Issues Resolved by This Update

This Hotfix addresses a problem where AutoCAD sometimes crashes on non-English versions of the Microsoft® Windows 7 or Windows 8 operating systems, during copy-and-paste operations, when the application is launched by double-clicking on a DWG™ file.

Installation Instructions

You must have administrative privileges on your Microsoft Windows operating system to complete the installation process.

This installation requires you to replace the following file:

- *acad.exe*
- *accore.dll*

Download the Hotfix for your application to a location on your local computer:

- For 32-bit operating systems (AutoCAD and related verticals):
AutoCAD_2014_Copy_Paste_Hotfix_for_non-English_OS_32bit.zip
- For 64-bit operating systems (AutoCAD and related verticals):
AutoCAD_2014_Copy_Paste_Hotfix_for_non-English_OS_64bit.zip

Double click the zip file and extract the resulting files to a location on your computer, e.g. *C:\Temp*.

To Replace the Files

1. Close all software applications.
2. Navigate to your product installation folder; for example *C:\Program Files\Autodesk\AutoCAD 2014*.
3. In the product installation folder, right-click on each file listed below, select Properties, and go to the Details tab. Replace each file on this list (following steps 4 and 5) if the version is lower than the one listed below.
 - acad.exe: 25.1.108.10
 - accore.dll: 19.1.108.10
4. In the product installation folder, right-click on the existing files and rename them (e.g. *accore.dll* to *accore.bak*).
5. Move the newly downloaded files from *C:\Temp* to this folder.

To Uninstall This Hotfix

1. Delete the files that you downloaded and installed.
2. Restore the files you renamed to their original names (e.g., *accore.bak* to *accore.dll*).
